PROPOSED SOLUTION

My Wealth

A personalized wealth journey for mass-affluent customers - inside the existing mobile app.

Self-service when I want independence. Human expertise when I need confidence.

Why this concept?

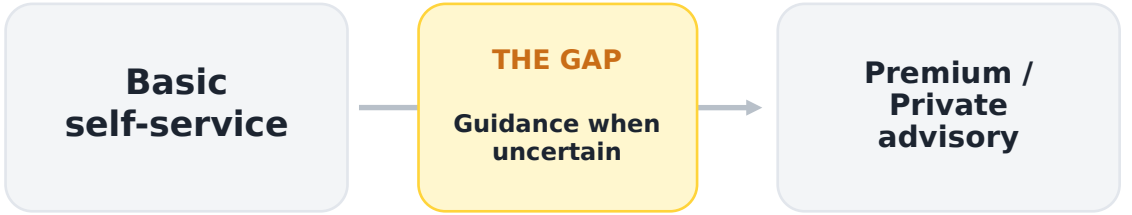

The interviews suggest a middle gap between basic self-service and full Premium / Private advisory.

HUNGARY

Mass-affluent customers were described as mainly non-advisory. Digital investing exists; personal advice sits mainly in Premium / Private.

SERBIA

Advised customers can use a banker, video meeting and advisory tool. The bank already identifies higher-value customers.

MY WEALTH - scalable guidance inside mobile banking

Expert evidence only; customer validation is still needed.

1. Unlock My Wealth when the customer becomes eligible

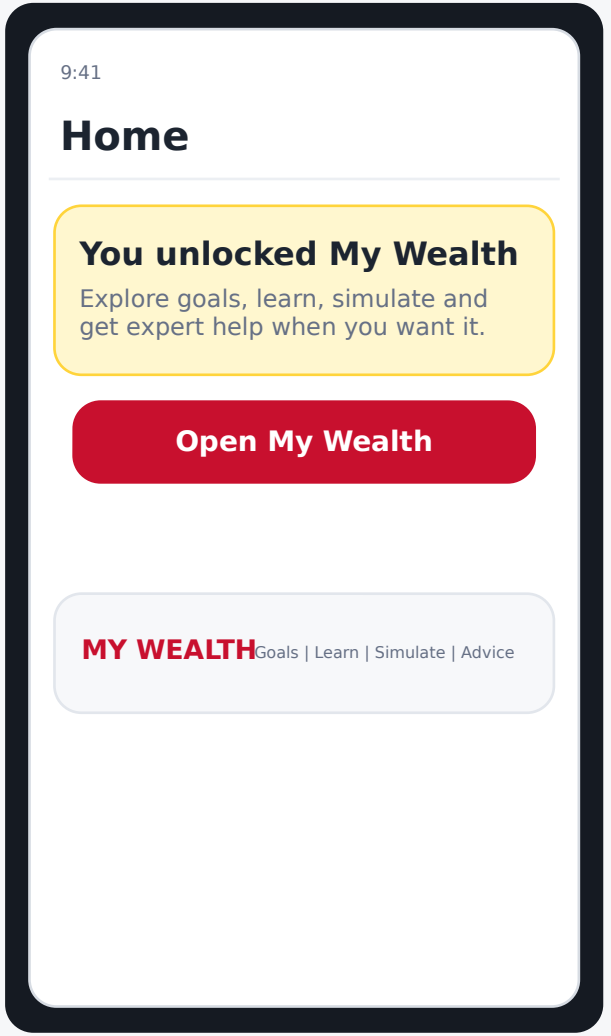

Use existing segmentation signals to invite the customer into a richer guidance experience - without forcing Premium.

THRESHOLD MET →

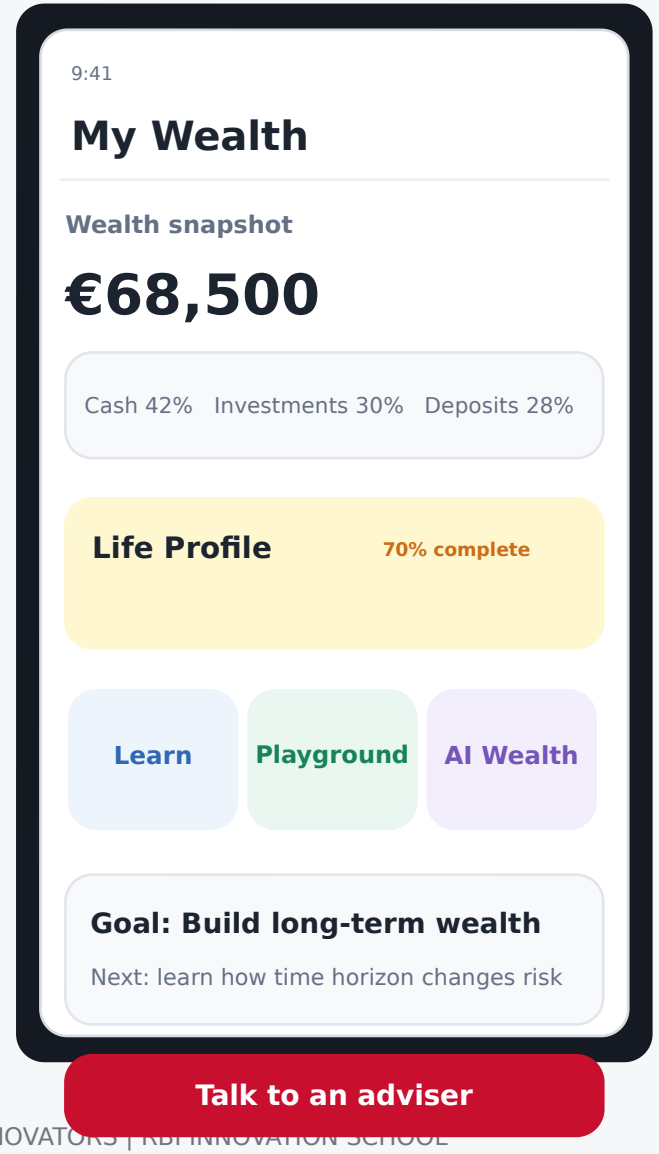

Design principle

Do not say “You have money, invest it.”
Invite the customer to unlock tools that help them understand options and decide what fits their goals.

2. My Wealth = the customer's wealth home

One place for the financial picture, goals and next best actions.

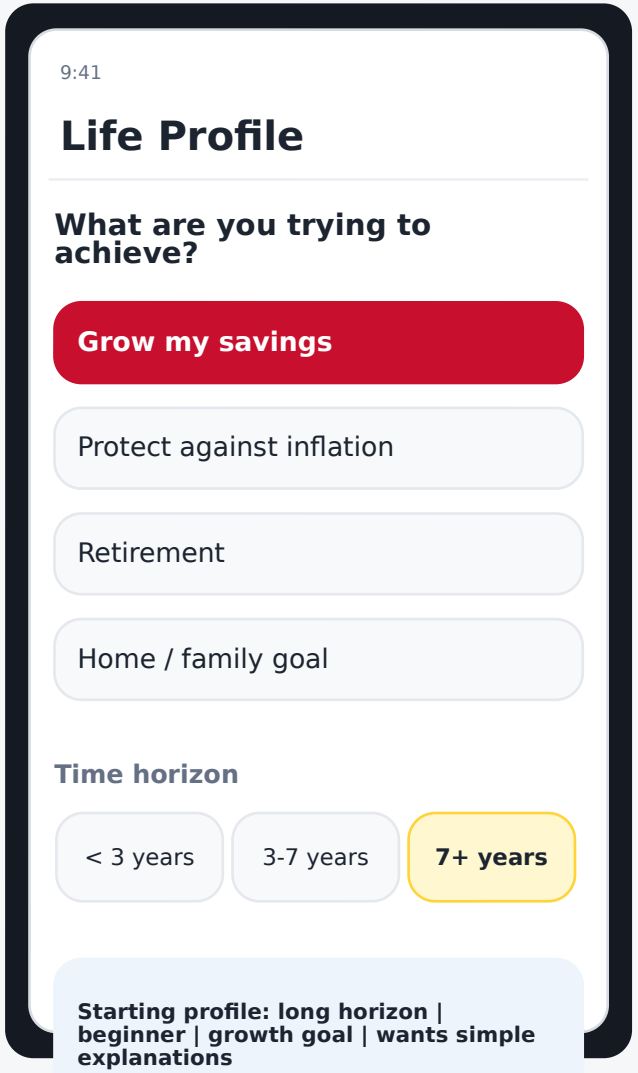

- A simple view of money held with the bank.
- Goals and progress - not only products.
- Personalized next steps from the Life Profile.
- Always visible: learn, explore, or ask a human.

Start with “What are you trying to achieve?” - not “Which fund do you want to buy?”

3. Life Profile = guided self-assessment

Personalize education and navigation before the formal investment process.

Goal	What is this money for?
Time	When might you need it?
Risk comfort	How do temporary losses feel?
Liquidity	How important is quick access?
Experience	How familiar are you with investing?
Support	Self-service, AI, or a person?

Formal MiFID / suitability checks remain in the approved investment or advisory process.

4. Build confidence: Learn + Playground + optional AI

Different customers can choose the support style that fits them.

LEARN

Personalized 2-3 minute lessons

- Risk vs return
- Diversification
- Liquidity
- Fees explained simply

PLAYGROUND

Practice with virtual money

- Fake €50k portfolio
- Stable / balanced / growth mix
- Run a market -15% scenario
- Learn without risking real money

AI WEALTH

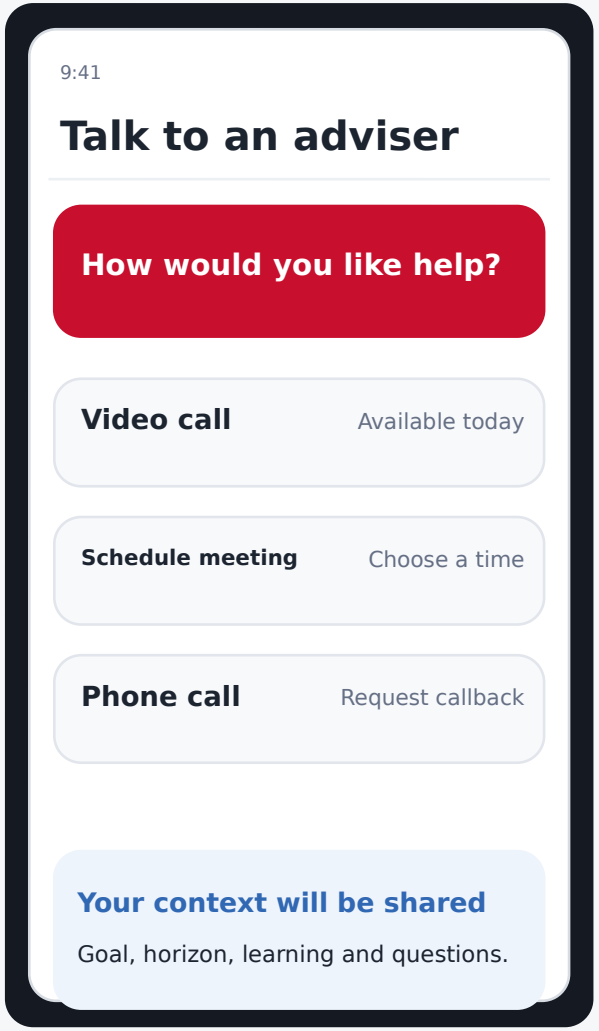

Optional explanation layer

- Explain products, risk and fees
- Use Life Profile for context
- Prepare questions for a meeting
- Escalate to a human when needed

Learn -> practice -> ask -> talk to a human -> decide

5. Smart handover to a real adviser

Customers choose video, phone or a meeting; the adviser receives context before the conversation.

ADVISER SUMMARY

Goal	Grow long-term savings
Horizon	7+ years
Experience	Beginner
Completed	Risk basics + diversification
Main question	**What happens if markets fall?**

Regulated recommendation / execution continues in the existing approved advisory process.

6. Engage at useful moments - not with constant sales calls

Relevant events can invite the customer back into My Wealth.

TRIGGER

Deposit matures

Review your options

TRIGGER

Salary / bonus grows

Update your goals

TRIGGER

Goal review due

Refresh Life Profile

TRIGGER

Market uncertainty

Understand before acting

Every nudge offers a choice: Explore myself | Ask AI | Talk to a human | Ignore for now

Customer-controlled engagement, not pressure.

Proposed end-to-end solution

One platform, multiple ways to engage - depending on confidence and preference.

Digital-first

Profile -> Learn -> Playground -> AI -> adviser if needed

Human-first

Profile -> Learn -> adviser -> existing advisory process

Prototype first: Unlock notification -> My Wealth Home -> Life Profile -> Choose support
